

RiskIntelligence

Company Profile

Risk Intelligence is an intelligence driven analyst and advisory Company with private and governmental clients, specialised in worldwide security threats and risks.

Risk Intelligence analyses are focused on piracy, organised crime, terrorism, insurgency and military conflicts and the interaction between any of these.

Risk Intelligence specialists currently count 15 security risk analysts and 10 security risk consultants in nine countries from academic, military, merchant marine, naval or intelligence backgrounds. Most have extensive field experience.

Risk Intelligence serves its clients and partners through offices in Copenhagen, Hamburg and Stockholm as well as representatives in Europe, Asia and North America.

Risk Intelligence gathers intelligence from first-hand local sources, on-site consultants and a vast, worldwide intelligence network.

Risk Intelligence's holistic approach to security risk analysis includes studies into the types of organisations involved, their tactics as well as the root causes of their existence. In order to understand the security threats facing our clients, Risk Intelligence takes a holistic approach: looking far beyond individual analysis of various types of threats. Risk Intelligence finds its analyses in the type and root of the organisations involved and then the type of criminal activity. Identifying a threat's origin and the perpetrators' organisation enables a forecast of the future likelihood of eliminating or limiting the threat.
